Subject: payson water company

This is in reference to docket#W-03514A-10-0116 and #W03514A-10-0117

This proposal is not acceptable Payson water company has not done anything to keep up with the number of people living in this community. they have not reinvested in their infrastructure and now they want us to pay for it.

I am a business man and if I let my tools become worn out and no longer useful then when a customer calls for service I don't tell him I would be glad to do the job but you have to buy me new tools first.

So as I see it Payson water company has been collecting from me for years and rather than take some of those profits and reinvest it in their wells and pumps they have been spending it else where. Now when things are wearing out and they need another well they want me to pay for it.

There are residents here that have wells and they have no problems with their water so I believe it is time that this water company lived up to their promise to supply us with water.

Why is it that all the other communities up here have plenty of water and ours doesn't?

Their short sightedness or just plain greed should not be passed on to us the consumer we have lived up to our side of the contract we pay our bills rain or shine.
